BLUEPRINT CHESAPEAKE MULTI-ASSET TREND ETF - FUND SUMMARY

Investment Objective

The Blueprint Chesapeake Multi-Asset Trend ETF (the “Fund”) seeks to preserve capital and generate long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses⁽¹⁾ (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.99%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses ⁽²⁾	0.07%
Acquired Fund Fees and Expenses ⁽²⁾	0.04%
Total Annual Fund Operating Expenses	1.10%

⁽¹⁾ The Fund’s adviser will pay, or require a sub-adviser to pay, all expenses incurred by the Fund (except for advisory fees and sub-advisory fees, as the case may be) excluding interest charges on any borrowings made for investment purposes, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, and litigation expenses, and other non-routine or extraordinary expenses.

⁽²⁾ Based on estimated amounts for the current fiscal year.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem or hold all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
	\$112	\$350

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the total annual fund operating expenses or in the Example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing pursuant to a trend following program called the Chesapeake Program (described below). The Chesapeake Program is comprised of two components:

- (i) **Derivatives Component:** The Fund will invest in futures contracts and futures-related instruments (such as forwards) and spot contracts in global markets across a wide range of asset classes, including equities, fixed income, currencies and commodities.
- (ii) **Long-Short Component:** The Fund will invest in both long and short positions in equity securities.

In addition, the Fund invests in cash, short-term U.S. Treasury securities, money market funds, and cash equivalents (the “Cash Strategy”).

The Fund’s portfolio is managed by sub-advisers Chesapeake Capital Corporation (“Chesapeake”) and Blueprint Fund Management, LLC (“Blueprint”). Chesapeake manages the Fund’s portfolio using the Chesapeake Program, while Blueprint manages the Cash Strategy. The Fund’s returns mainly arise from the Chesapeake Program.

The Fund’s portfolio is usually comprised of 300-500 securities and financial instruments, which the Fund invests in directly or indirectly via the Subsidiary (described below). The Fund is classified as “non-diversified,” which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund.

The Chesapeake Program - Overview.

Chesapeake manages the Fund’s investments using their proprietary long-term *trend following* “Chesapeake Program.” This Program generates trade signals based on market indicators such as current prices and moving average prices. Chesapeake’s trade decisions are primarily automated, relying on computer-driven models to identify buying and selling opportunities. The Chesapeake Program, and each of the Derivatives and Long-Short components, seeks to preserve capital while also seeking to provide positive annual returns.

The Program analyzes various market metrics, including price action, market volatility, open interest, and daily trading volume, to predict market opportunities and identify recurring price patterns. The data comes from a wide array of markets, such as U.S. and non-U.S. stock indices, single stocks, ETFs, fixed income futures, currencies, and commodities. Frequent buying and selling of portfolio holdings may occur to seek to achieve the Fund’s investment objective. The Chesapeake Program will allocate assets to its Derivatives Component and Long-Short Component based on the Program’s then-current view of risk levels of the wide array of markets. Approximately, one-half of the Fund’s market risk exposure will be through the Program’s Derivatives Component and the other half through its Long-Short Component.

See “Additional Information About the Fund’s Principal Investment Strategies” for a more complete description of the Chesapeake Program and its two components.

Derivatives Component

For the Fund’s Derivatives Component, the Chesapeake Program analyzes multiple market metrics to generate trend-following trade signals (i.e., investment decisions) for derivatives transactions. Through the Derivatives Component, the Fund will invest in exchange-traded commodity futures contracts, options on futures contracts and commodities; spot and forward currency contracts. As noted above, the Derivatives component seeks to preserve capital while also seeking to provide positive annual returns.

The Fund’s derivatives holdings will relate to fixed-income instruments or fixed-income ETFs, currencies (including up to 2% (notional value) in digital currencies), and commodities (e.g., agricultural products, energies, precious and industrial metals). The Fund does not invest directly in digital currencies; rather the Fund invests in cryptocurrencies only indirectly via exchange-traded futures contracts.

Long-Short Component

For the Fund’s Long-Short Component, the Chesapeake Program analyzes a large number of market metrics from a broad range of markets to generate trend following trade signals to make its long and short investment decisions. As noted above, the Long-Short component seeks to preserve capital while also seeking to provide positive annual returns.

Under the Chesapeake Program, the Fund may take long and short positions of U.S. and non-U.S. equity securities as part of its broader trend-following program. The Fund’s equity holdings may be 100% long, 100% short, or a mix.

For long holdings, the Fund may invest in the equity securities of U.S. and foreign issuers (directly or via ADRs) without regard to market capitalization. The Fund will take short positions in small-cap, mid-cap, and large-cap, U.S. equity securities or indices. In addition, a portion of the short sales of the Fund’s Long-Short Strategy may be accomplished by investing in derivatives. That is, the Fund may effect shorting by selling futures contracts on either large-cap equity securities or indices to seek positive returns from corresponding price declines. The Fund may do so either directly or indirectly via the Subsidiary. See “Additional Information About the Fund’s Principal Investment Strategies” for a description of shorting securities).

Cash Strategy

Blueprint manages the Fund’s Cash Strategy, which will principally be used for margin and collaterals purposes for the Fund’s derivatives transactions. The Fund will invest in short-term U.S. Treasury securities (i.e., with a duration of 5 years or less), money market funds, cash, and cash equivalents.

Cayman Subsidiary

The Fund intends to gain exposure to futures contracts and other derivative instruments either directly or indirectly through a wholly-owned Cayman Islands subsidiary (the “Subsidiary”) that is advised by Toroso Investments, LLC (the “Adviser”) and sub-advised by Chesapeake. The Fund may invest up to 25% of its total assets in the Subsidiary, tested at the end of each fiscal quarter. The Subsidiary will generally invest in futures contracts and other derivative instruments that do not generate “qualifying income” under the source of income test required to qualify as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). Unlike the Fund, the Subsidiary may invest without limitation in futures contracts and other derivative instruments; however, the Subsidiary will comply with the same Investment Company Act of 1940, as amended (the “1940 Act”), requirements that are applicable to the Fund’s transactions in derivatives. In addition, the Subsidiary will be subject to the same fundamental investment restrictions and will follow the same compliance policies and procedures as the Fund. Unlike the Fund, the Subsidiary will not seek to qualify as a RIC under the Code. The Fund is the sole investor in the Subsidiary and does not expect the shares of the Subsidiary to be offered or sold to other investors. Except as otherwise noted, for the purposes of this Prospectus, references to the Fund’s investments include the Fund’s indirect investments through the Subsidiary.

The financial statements of the Subsidiary will be consolidated with the Fund’s financial statements in the Fund’s Annual and Semi-Annual Reports.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its investment objective. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Fund — Principal Risks of Investing in The Fund.”

Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Counterparty Risk. Counterparty risk is the likelihood or probability that a party involved in a transaction might default on its contractual obligation. Where the Fund enters into derivative contracts that are exchange-traded, the Fund is subject to the counterparty risk associated with the Fund’s clearing broker or clearinghouse. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties.

Commodities Risk. Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, embargoes, tariffs and international economic, political and regulatory developments. Exposure to the commodities markets through investments in commodities (or indirectly via derivative instruments) may subject the Fund to greater volatility than investments in traditional securities. Significant changes in the value of commodities may lead to volatility in the Fund’s NAV and market price.

- *Energy Commodities Risk.* The prices of energy commodities are subject to national and global political events such as governmental regulation and intervention, price controls, and restrictions on production levels. Energy commodities have had significant price swings in recent years. Markets for various energy-related commodities can have significant volatility, and are subject to control or manipulation by large producers or purchasers.
- *Precious Metal Commodities Risk.* The prices of precious metals may be influenced by macroeconomic conditions, including confidence in the global monetary system and the relative strength of various currencies, as well as demand in the industrial and jewelry sectors. Political events also influence the prices of precious metals. Prices are influenced by supplies of precious metals, which may be affected by sales by central banks and governmental agencies that hold large amounts of these metals, particularly gold.
- *Industrial Metal Commodities Risk.* The prices of commodities comprising the industrial metals are subject to a number of factors that can cause price fluctuations, including changes in the level of industrial activity; disruptions in mining, storing, and refining the metals; adjustments to inventory; variations in production costs; and regulatory compliance costs.
- *Grains Commodities Risk.* The commodities comprising the grains are subject to a number of factors that can cause price fluctuations, including weather conditions, changes in government policies and trade agreements, planting decisions, and changes in demand.

Equity Market Risk. By virtue of the Fund's investments in equity securities, the Fund is exposed to common stocks which subjects the Fund to equity market risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers. Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests.

Fixed Income Securities Risk. The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Generally, fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower-rated securities are more volatile than shorter-term and higher-rated securities.

Currency Risk. Currency risk is the risk that changes in currency exchange rates will negatively affect securities denominated in, and/or receiving revenues in, foreign currencies. The liquidity and trading value of foreign currencies could be affected by global economic factors, such as inflation, interest rate levels, and trade balances among countries, as well as the actions of sovereign governments and central banks. Adverse changes in currency exchange rates (relative to the U.S. dollar) may erode or reverse any potential gains from the Fund's investments in securities denominated in a foreign currency or may widen existing losses.

Credit Risk. Credit risk refers to the possibility that the issuer of a security will not be able to make principal and interest payments when due. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer. Securities rated in the four highest categories by the rating agencies are considered investment grade but they may also have some speculative characteristics. Investment grade ratings do not guarantee that the issuer will not default on its payment obligations or that bonds will not otherwise lose value.

Foreign Securities Risk. The Fund may invest in foreign securities. Such investments involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies. Financial markets in foreign countries often are not as developed, efficient, or liquid as financial markets in the United States, and therefore, the prices of non-U.S. securities and instruments can be more volatile. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, which may include the imposition of economic sanctions. Generally, there is less readily available and reliable information about non-U.S. issuers due to less rigorous disclosure or accounting standards and regulatory practices.

Leverage Risk. The derivative instruments in which the Fund may invest provide the economic effect of financial leverage by creating additional investment exposure to the underlying instrument, as well as the potential for greater loss. **If the Fund uses leverage through purchasing derivative instruments, the Fund has the risk that losses may exceed the net assets of the Fund.** The net asset value of the Fund while employing leverage will be more volatile and sensitive to market movements.

Derivatives Risk. Derivatives are financial instruments that derive value from the underlying reference asset or assets, such as stocks, bonds, commodities, currencies, funds (including ETFs), interest rates or indexes. The Fund's investments in derivatives may pose risks in addition to, and greater than, those associated with directly investing in securities or other ordinary investments, including risk related to the market, imperfect correlation with underlying investments or the Fund's other portfolio holdings, higher price volatility, lack of availability, counterparty risk, liquidity, valuation and legal restrictions. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The use of derivatives may result in larger losses or smaller gains than directly investing in the underlying reference asset(s). Because derivatives often require only a limited initial investment, the use of derivatives may expose the Fund to losses in excess of those amounts initially invested. In addition, the Fund's investments in derivatives are subject to the following risks:

Futures Contracts. Risks of futures contracts include: (i) an imperfect correlation between the value of the futures contract and the underlying asset; (ii) possible lack of a liquid secondary market; (iii) the inability to close a futures contract when desired; (iv) losses caused by unanticipated market movements, which may be unlimited; (v) an obligation for the Fund to make daily cash payments to maintain its required margin, particularly at times when the Fund may have insufficient cash; and (vi) unfavorable execution prices from rapid selling.

Forward Currency Contracts Risk. The Fund invests in forward currency contracts. A forward currency contract is a negotiated agreement between the contracting parties to exchange a specified amount of currency at a specified future time at a specified rate. The rate can be higher or lower than the spot rate between the currencies that are the subject of the contract. Forward currency contracts may be used to protect against uncertainty in the level of future foreign currency exchange rates or to gain or modify exposure to a particular currency. Hedging the Fund's currency risks involves the risk of mismatching the Fund's objectives under a forward contract with the value of securities denominated in a particular currency. Furthermore, such transactions reduce or preclude the opportunity for gain if the value of the currency should move in the direction opposite to the position taken. There is an additional risk to the effect that currency contracts create exposure to currencies in which the Fund's securities are not denominated. Unanticipated changes in currency prices may result in poorer overall performance for the Fund than if it had not entered into such contracts.

Short Sales Risk. In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses for the Fund's portfolio.

Cayman Subsidiary Risk. By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary's investments. The futures contracts and other investments held by the Subsidiary are subject to the same economic risks that apply to similar investments if held directly by the Fund. The Subsidiary is not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. Changes in the laws of the United States and the Cayman Islands could result in the inability of the Fund and/or the Subsidiary to continue to operate as it does currently and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

Tax Risk. The Fund intends to treat any income it may derive from futures received by the Subsidiary as "qualifying income" under the provisions of the Code applicable to RICs. In March of 2019, the IRS published Regulations that concluded that income from a corporation similar to the Subsidiary would be qualifying income, if the income is related to the Fund's business of investing in stocks or securities. Although the Regulations do not require distributions from the Subsidiary, the Fund could possibly cause the Subsidiary to make distributions to the Fund for the purposes of potentially making distributions to its shareholders. The Fund generally will be required to include in its own taxable income the income of the Subsidiary for a tax year, regardless of whether the Fund receives a distribution of the Subsidiary's income in that tax year. This income would be subject to the distribution requirement for qualification as a regulated investment company and would be taken into account for purposes of the 4% excise tax.

If the Fund did not qualify as a RIC for any taxable year and certain relief provisions were not available, the Fund's taxable income would be subject to tax at the Fund level and to a tax at the shareholder level when such income is distributed. In such event, in order to re-qualify for taxation as a RIC the Fund might be required to recognize unrealized gains, pay substantial taxes, interest and penalties and make certain distributions. This would cause investors to incur higher tax liabilities than they otherwise would have incurred, which would have a negative impact on the Fund's returns. In such event, the Fund's Board of Trustees may determine to reorganize or close the Fund or materially change the Fund's investment objective and strategies. In the event that the Fund fails to qualify as a RIC, the Fund will promptly notify shareholders of the implications of that failure.

Sub-Adviser Strategy Risk. The performance of the Fund's Derivatives and Long-Short Strategies depends primarily on the ability of Chesapeake to react to price movements in the relevant markets and underlying derivative instruments and futures and forward contracts. Such price movements may be volatile and may be influenced by, among other things:

- changes in interest rates;
- governmental, agricultural, trade, fiscal, monetary and exchange control programs and policies;
- weather and climate conditions;
- natural disasters, such as hurricanes;
- changing supply and demand relationships;
- changes in balances of payments and trade;
- U.S. and international rates of inflation and deflation;
- currency devaluations and revaluations;
- U.S. and international political and economic events; and
- changes in the philosophies and emotions of various market participants.

Chesapeake's investment process may not take all of these factors into account. The successful use of futures contracts and other derivatives draws upon Chesapeake's skill and experience with respect to such instruments and are subject to special risk considerations.

The trading decisions of Chesapeake are based in part on mathematical models, which are implemented as automated computer algorithms that Chesapeake has developed over time. The successful operation of the automated computer algorithms on which Chesapeake's trading decisions are based is reliant upon Chesapeake's information technology systems and its ability to ensure those systems remain operational and that appropriate disaster recovery procedures are in place. Further, as market dynamics shift over time, a previously highly successful model may become outdated, perhaps without Chesapeake recognizing that fact before substantial losses are incurred. There can be no assurance that Chesapeake will be successful in maintaining effective mathematical models and automated computer algorithms.

There is no assurance that the Fund's investment in a derivative instrument with leveraged exposure to certain investments and markets will enable the Fund to achieve its investment objective.

Commodity-Linked Derivatives Tax Risk. The tax treatment of commodity-linked derivative instruments may be adversely affected by changes in legislation, regulations, or other legally binding authority. As a RIC, the Fund must derive at least 90% of its gross income each taxable year from certain qualifying sources of income under the Code. If, as a result of any adverse future legislation, U.S. Treasury regulations, and/or guidance issued by the Internal Revenue Service (the "IRS"), the income of the Fund from certain commodity-linked derivatives, including income from the Fund's investments in the Subsidiary, were treated as non-qualifying income, the Fund may fail to qualify as RIC and/or be subject to federal income tax at the Fund level. The uncertainty surrounding the treatment of certain derivative instruments under the qualification tests for a RIC may limit the Fund's use of such derivative instruments.

The Fund intends to limit its investment in the Subsidiary to no more than 25% of the value of its total assets in order to satisfy certain asset diversification requirements for taxation as a regulated investment company. The Fund intends to manage the exposure to the Subsidiary so that the Fund's investments in the Subsidiary do not exceed 25% of the total assets at the end of any quarter. If the Fund's investments in the Subsidiary were to exceed 25% of the Fund's total assets at the end of a tax quarter, the Fund generally has a grace period to cure such lack of compliance. If the Fund fails to timely cure, it may no longer be eligible to be treated as a RIC.

Commodity Pool Regulatory Risk. The Fund's investment exposure to futures instruments will cause it to be deemed to be a commodity pool, thereby subjecting the Fund to regulation under the CEA and CFTC rules. The Adviser is registered as a commodity pool operator ("CPO") and the Fund will be operated in accordance with applicable CFTC rules, as well as the regulatory scheme applicable to registered investment companies. Registration as a CPO imposes additional compliance obligations on the Adviser and the Fund related to additional laws, regulations, and enforcement policies, which could increase compliance costs and may affect the operations and financial performance of the Fund. However, the Fund's status as a commodity pool and the Adviser's registration as a CPO, are not expected to materially adversely affect the Fund's ability to achieve its investment objective. The CFTC has not passed on the adequacy of this Prospectus.

Non-Diversification Risk. Because the Fund is "non-diversified," it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

U.S. Government and U.S. Agency Obligations Risk. The Fund may invest in securities issued by the U.S. government or its agencies or instrumentalities. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. Although U.S. Treasuries are backed by the U.S. government, those government policies may change both in terms of the payment of interest and in the payment of principal. Furthermore, while holding a treasury until maturity can guarantee principal, selling a treasury prior to maturity or buying a treasury subsequent to issue date may put principal at risk.

The remaining principal risks are presented in alphabetical order. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Cryptocurrency Risk. From time to time, the Fund may have market exposure to cryptocurrencies (via futures contracts as noted above), which are often referred to as a "virtual currency" or "digital currency," and operate as a decentralized, peer-to-peer financial exchange and value storage that can be used like money. Cryptocurrencies use cryptography to secure transactions, to control the creation of additional units, and to verify the transfer of assets. A cryptocurrency operates without central authority or banks and is not backed by any government. A cryptocurrency is also not a legal tender. Federal, state or foreign governments may restrict the use and exchange of a cryptocurrency, and regulation in the U.S. is still developing.

Cryptocurrency technology is new and untested, and investments with exposure to cryptocurrencies come with substantial risks. These include the potential failure of the technology facilitating cryptocurrency transfers, as well as the uncertainties posed by supply and demand forces in an unregulated market that is not backed by a government. Regulatory actions that may limit or enhance the ability to

exchange or utilize cryptocurrencies for payments could impact their demand, and future regulatory changes could be detrimental to the Fund's investments. Development and acceptance of competing platforms or technologies could also affect the use of cryptocurrencies. Additionally, potential fraud, security breaches, business failures, and technical defects pose significant risks to companies engaged in cryptocurrency activities. Cryptocurrency's reliance on internet connectivity, its decentralized nature, and its usage of open-source technologies may further increase risks of fraud or cyber-attacks.

The market for cryptocurrency futures is potentially less liquid and more volatile than more established futures markets, despite substantial growth since trading commenced. The pricing of cryptocurrency futures contracts is influenced by various factors, including supply, demand, market conditions, position limits, accountability levels, collateral requirements, and the availability of counterparties. Consequently, these contracts could trade at a significant premium over the spot price of cryptocurrency. If the Fund purchases futures contracts at a premium and this premium declines, it could negatively impact the value of an investment in the Fund. The Fund's ability to achieve its desired exposure to cryptocurrency futures contracts could be limited by these factors, potentially affecting its returns.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as "Authorized Participants" or "APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occurs, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. Any such decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Fund shares trading at a premium or discount to its NAV with possible greater than normal intraday bid-ask spreads.
- *Cash Redemption Risk.* An ETF's investment strategy may require it to redeem its shares for cash or to otherwise include cash as part of its redemption proceeds. For example, an ETF may not be able to redeem in-kind certain securities held by the ETF (e.g., derivative instruments). In such a case, the ETF may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the ETF to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the ETF may pay out higher annual capital gain distributions than if the in-kind redemption process was used. By paying out higher annual capital gain distributions, investors may be subjected to increased capital gains taxes.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility and when there may be widening bid-ask spreads. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant which would result in a further widening of the bid-ask spreads.
- *Trading.* Although Shares are listed for trading on a national securities exchange, such as the NYSE Arca, Inc. (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any measurable volume on any stock exchange. That is, an active trading market for shares of the Fund may not develop or be maintained. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's portfolio holdings, which could be less liquid than Shares.

General Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Investments in the Fund's portfolio may underperform in comparison to investments in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations of inflation), interest rates, global demand for particular products or resources, natural disasters or events, pandemic diseases, terrorism, regulatory events, and government controls.

Illiquid Investments Risk. The Fund may, at times, hold illiquid investments, by virtue of the absence of a readily available market for certain of its investments, or because of legal or contractual restrictions on sales. The Fund could lose money if it is unable to dispose of an investment at a time or price that is most beneficial to the Fund.

Interest Rate Risk: Interest rate risk is the risk that prices of fixed income securities generally increase when interest rates decline and decrease when interest rates increase. The Fund may lose money if short-term or long-term interest rates rise sharply or otherwise change in a manner not anticipated by the Sub-Advisers, as the case may be.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on Chesapeake and Blueprint's success or failure to implement investment strategies for the Fund and/or the Subsidiary.

Market Capitalization Risk.

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.
- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- *Micro-Capitalization Investing.* Micro-capitalization companies often have limited product lines, narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies, including companies which are considered small- or mid-capitalization. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund's portfolio.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

Recent Market Events Risk. U.S. and international markets have experienced significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including the impact of COVID-19 as a global pandemic, which has resulted in a public health crisis, disruptions to business operations and supply chains, stress on the global healthcare system, growth concerns in the U.S. and overseas, staffing shortages and the inability to meet consumer demand, and widespread concern and uncertainty. The global recovery from COVID-19 is proceeding at slower than expected rates due to the emergence of variant strains and may last for an extended period of time. Continuing uncertainties regarding interest rates, rising inflation, political events, rising government debt in the U.S., and trade tensions also contribute to market volatility. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so.

Underlying Fixed Income ETF Risks. The Fund (and the Subsidiary) may invest in fixed income ETFs indirectly via futures contracts or other derivatives transactions. The Fund will be subject to substantially the same risks as those associated with the indirect ownership of securities held by the fixed income ETFs.

Performance

Performance information for the Fund is not included because the Fund has not completed a full calendar year of operations as of the date of this Prospectus. When such information is included, this section will provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance history from year to year and showing how the Fund's average annual total returns compare with those of a broad measure of market performance. Although past performance of the Fund is no guarantee of how it will perform in the future, historical performance may give some indication of the risks of investing in the Fund. Updated performance information will be available on the Fund's website at <https://tfpnetf.com/>.

Management

Investment Adviser

Toroso Investments, LLC (“Toroso” or the “Adviser”) serves as investment adviser to the Fund and the Subsidiary.

Investment Sub-Adviser and Futures Trading Advisor

Chesapeake Capital Corporation (“Chesapeake”) serves as investment sub-adviser to the Fund and serves as futures trading advisor to the Fund and the Subsidiary.

Investment Sub-Adviser

Blueprint Fund Management, LLC (“Blueprint”) serves as investment sub-adviser to the Fund.

Portfolio Managers

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund.

Jerry Parker, Chairman of the Board of Directors and the Chief Executive Officer of Chesapeake, has been a portfolio manager of both the Fund and the Subsidiary since their inception in 2023.

Jon Robinson, co-founder and CEO of Blueprint, has been a portfolio manager of the Fund since its inception in 2023.

Qiao Duan, CFA, Portfolio Manager for Toroso, has been a portfolio manager of both the Fund and the Subsidiary since their inception in 2023.

Charles A. Ragauss, CFA, Portfolio Manager for Toroso, has been a portfolio manager of both the Fund and the Subsidiary since their inception in 2023.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the “bid-ask spread.”

When available, information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at <https://tfpnetf.com/>.

Tax Information

Fund distributions can be taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or some combination thereof) unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary such as a bank (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products including the Fund or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements will not result in increased Fund expenses, ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Blueprint Chesapeake Multi-Asset Trend ETF (the “Fund”) seeks to preserve capital and generate long-term capital appreciation.

An investment objective is fundamental if it cannot be changed without the consent of the holders of a majority of the outstanding Shares. The Fund's investment objective has not been adopted as a fundamental investment policy and therefore may be changed without the consent of the Fund's shareholders upon approval by the Board of Trustees (the "Board") of Tidal Trust II (formerly Tidal ETF Trust II) (the "Trust") and written notice to shareholders.

Additional Information About the Fund's Principal Investment Strategies

The Chesapeake Program is a long-term trend following program that utilizes robust trading systems across a broad set of markets with a systematic investment approach, focusing on capital preservation while attempting to provide positive annual returns. By engaging a broad set of markets and robust trading systems, Chesapeake seeks to maximize the profit in each trade by following its trading models generally without human intervention and regardless of market conditions.

Chesapeake analyzes markets, including price movement, market volatility, open interest, and volume, as a means of predicting buy and sell opportunities and discovering any repeating patterns in past historical prices. Chesapeake analyzes a large number of statistical and mathematical formulas and techniques (based on an extensive proprietary and confidential database of market statistics) to search for patterns in data and to develop, use and monitor trading strategies. Chesapeake places primary emphasis on technical analysis (a method of evaluating an investment opportunity by using charts or computer programs to identify patterns in market data, such as price change, rates of change, and changes in volume of trading, open interest and other statistical indicators, in order to project the direction that a market or the price of an investment will move) in assessing buy and sell opportunities.

Trading decisions implemented in accordance with the Chesapeake Program are based on a combination of Chesapeake's trading systems, techniques used to predict market directions, trading discretion, judgment and experience and on market opportunities. Chesapeake's trading methodology is both systematic and strategic. Trading decisions require the exercise of strategic judgment by Chesapeake in evaluating its trading methods that use technical analysis, in their possible modification from time to time, and in their implementation. Chesapeake retains the right to develop and make changes to the Chesapeake Program at its sole discretion. Any such changes will not be deemed to constitute a material change in the Fund's investment objective and may be made without notification to the Fund or the Adviser.

The following provides a high-level description of the metrics referenced in the Fund's principal investment strategy:

- Price action - the movement of a security's price over time.
- Market volatility – generally, a more volatile security is considered riskier than lower volatility securities.
- Open interest – the total number of futures contracts long or short in a delivery month or market that has been entered into and not yet liquidated by an offsetting transaction or fulfilled by delivery. This metric provides Chesapeake with key data regarding the liquidity of a market.
- Daily trading volume – the number of shares or contracts traded in a given period. Chesapeake considers this information when analyzing liquidity.

The following provides a high-level description of the types of derivatives transactions in which the Fund (and Subsidiary) may invest:

- An option contract gives the purchaser of the option contract the right to purchase (for a call option) or sell (for a put option) the underlying asset (like precious metals) at a specified price (the "strike price"). The seller of an option contract obligates the holder to deliver shares (for a sold or "short" call) or buy shares (for a sold or "short" put) of the underlying asset at a specified price (the "strike price"). Options contracts must be exercised or traded to close within a specified time frame, or they expire.
- In a spot currency contract, the Fund agrees to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date (the spot date). This date is typically within three business days of inception of the contract.
- A forward currency contract is a negotiated agreement between the contracting parties to exchange a specified amount of currency at a specified future time at a specified rate (e.g., 30, 60, or 90 days). The rate can be higher or lower than the spot rate between the currencies that are the subject of the contract.

A "long" position in a security means that you own the security. Investors (like the Fund) maintain "long" security positions in the expectation that the security will rise in value in the future. In contrast, if an investor (like the Fund) takes a "short" position, it does so to seek positive returns from price declines in the security.

The following provides a high-level description of shorting methodologies that may be used by the Fund:

- *Shorting by Borrowing.* To effect a short sale by borrowing, the Fund will arrange through a broker to borrow the security it does not own to be delivered to a buyer of such security. In borrowing the security to be delivered to the buyer, the Fund will become obligated to replace the security borrowed at the time of replacement, regardless of the market price at that time. A short sale results in a gain when the price of the securities sold short declines between the date of the short sale and the date on which a security is purchased to replace the borrowed security. Conversely, a short sale will result in a loss if the price of the

security sold short increases. When the Fund makes a short sale, the broker effecting the short sale typically holds the proceeds as part of the collateral securing the Fund's obligation to cover the short position.

- *Shorting by Futures Contracts.* In addition to shorting by borrowing, the Fund may effect shorting by selling futures contracts on either large-cap equity securities or indices to seek positive returns from corresponding price declines. The Fund may do so either directly or indirectly via the Subsidiary.

ADDITIONAL INFORMATION RELATED TO THE SUBSIDIARY

The Fund complies with the provisions of the 1940 Act governing investment policies on an aggregate basis with the Subsidiary. The Fund complies with the provisions of the 1940 Act governing capital structure and leverage (Section 18) on an aggregate basis with the Subsidiary so that the Fund treats the Subsidiary's debt as its own for purposes of Section 18. The Fund's investment adviser complies with Section 15 of the 1940 Act (regarding advisory agreements) with respect to the Subsidiary. The Subsidiary complies with the 1940 Act provisions relating to affiliated transactions and custody (Section 17). The Subsidiary's custodian is U.S. Bank. The Fund does not intend to create or acquire primary control of any entity which primarily engages in investment activities in securities or other assets, other than entities wholly-owned or majority-owned by the Fund.

Principal Risks of Investing in the Fund

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's NAV per share, trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value an investor's performance in the Fund:

Cayman Subsidiary Risk. By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary's investments. The futures contracts and other investments held by the Subsidiary are subject to the same economic risks that apply to similar investments if held directly by the Fund. The Subsidiary is not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. Changes in the laws of the United States and the Cayman Islands could result in the inability of the Fund and/or the Subsidiary to continue to operate as it does currently and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

Commodities Risk. Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, embargoes, tariffs and international economic, political and regulatory developments. Exposure to the commodities markets through investments in commodities (or indirectly via derivative instruments) may subject the Fund to greater volatility than investments in traditional securities. Significant changes in the value of commodities may lead to volatility in the Fund's NAV and market price.

- *Energy Commodities Risk.* The prices of energy commodities are subject to national and global political events such as governmental regulation and intervention, price controls, and restrictions on production levels. Energy commodities have had significant price swings in recent years. Markets for various energy-related commodities can have significant volatility, and are subject to control or manipulation by large producers or purchasers.
- *Precious Metal Commodities Risk.* The prices of precious metals may be influenced by macroeconomic conditions, including confidence in the global monetary system and the relative strength of various currencies, as well as demand in the industrial and jewelry sectors. Political events also influence the prices of precious metals. Prices are influenced by supplies of precious metals, which may be affected by sales by central banks and governmental agencies that hold large amounts of these metals, particularly gold.
- *Industrial Metal Commodities Risk.* The prices of commodities comprising the industrial metals are subject to a number of factors that can cause price fluctuations, including changes in the level of industrial activity; disruptions in mining, storing, and refining the metals; adjustments to inventory; variations in production costs; and regulatory compliance costs.
- *Grains Commodities Risk.* The commodities comprising the grains are subject to a number of factors that can cause price fluctuations, including weather conditions, changes in government policies and trade agreements, planting decisions, and changes in demand.

Commodity-Linked Derivatives Tax Risk. The tax treatment of the Fund's use of commodity-linked derivative instruments may be adversely affected by changes in legislation, regulations or other legally binding authority. If, as a result of any such adverse action, the income of the Fund from certain commodity-linked derivatives was treated as non-qualifying income for purposes of the Fund's qualification as a regulated investment company, the Fund might fail to qualify as such and be subject to federal income tax at the Fund

level. As a regulated investment company, the Fund must derive at least 90% of its gross income for each taxable year from sources treated as qualifying income under the Code. The IRS has issued a number of private letter rulings to other mutual funds, upon which the Fund cannot rely, which indicate that income from a fund's investment in certain commodity-linked notes and a wholly owned foreign subsidiary that invests in commodity-linked derivatives, such as the Subsidiary, constitutes qualifying income. However, in September 2016 the IRS announced that it will no longer issue private letter rulings on questions relating to the treatment of a corporation as a regulated investment company that require a determination of whether a financial instrument or position is a security under section 2(a)(36) of the Investment Company Act. A financial instrument or position that constitutes a security under section 2(a)(36) of the Investment Company Act generates qualifying income for a corporation taxed as a regulated investment company. The IRS's announcement caused it to revoke the portion of any rulings relating to a mutual fund's investment in commodity-linked notes that required such a determination, some of which have been revoked prospectively as of a date agreed upon with the IRS. Accordingly, the Fund may invest in certain commodity-linked notes: (a) directly only to the extent that such commodity-linked notes constitute securities under section 2(a)(36) of the Investment Company Act or (b) indirectly through the Subsidiary.

The Fund intends to manage the exposure to the Subsidiary so that the Fund's investments in the Subsidiary do not exceed 25% of the total assets at the end of any quarter. If the Fund's investments in the Subsidiary were to exceed 25% of the Fund's total assets at the end of a tax quarter, the Fund, generally, has a grace period to cure such lack of compliance. If the Fund fails to timely cure, it may no longer be eligible to be treated as a RIC.

Commodity Pool Regulatory Risk. The Fund's investment exposure to futures instruments will cause it to be deemed to be a commodity pool, thereby subjecting the Fund to regulation under the CEA and CFTC rules. The Adviser is registered as a commodity pool operator ("CPO") and the Fund will be operated in accordance with applicable CFTC rules, as well as the regulatory scheme applicable to registered investment companies. Registration as a CPO imposes additional compliance obligations on the Adviser and the Fund related to additional laws, regulations, and enforcement policies, which could increase compliance costs and may affect the operations and financial performance of the Fund. However, the Fund's status as a commodity pool and the Adviser's registration as a CPO, are not expected to materially adversely affect the Fund's ability to achieve its investment objective. The CFTC has not passed on the adequacy of this Prospectus.

Counterparty Risk. Counterparty risk is the likelihood or probability that a party involved in a transaction might default on its contractual obligation. Where the Fund enters into derivative contracts that are exchange-traded, the Fund is subject to the counterparty risk associated with the Fund's clearing broker or clearinghouse. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties.

Credit Risk. Credit risk refers to the possibility that the issuer of a security will not be able to make principal and interest payments when due. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer. Securities rated in the four highest categories by the rating agencies are considered investment grade but they may also have some speculative characteristics. Investment grade ratings do not guarantee that the issuer will not default on its payment obligations or that bonds will not otherwise lose value.

Cryptocurrency Risk. From time to time, the Fund may have market exposure to cryptocurrencies (via futures contracts as noted above), which are often referred to as a "virtual currency" or "digital currency," and operate as a decentralized, peer-to-peer financial exchange and value storage that can be used like money. Cryptocurrencies use cryptography to secure transactions, to control the creation of additional units, and to verify the transfer of assets. A cryptocurrency operates without central authority or banks and is not backed by any government. A cryptocurrency is also not a legal tender. Federal, state or foreign governments may restrict the use and exchange of a cryptocurrency, and regulation in the U.S. is still developing.

Cryptocurrency technology is new and untested, and investments with exposure to cryptocurrencies come with substantial risks. These include the potential failure of the technology facilitating cryptocurrency transfers, as well as the uncertainties posed by supply and demand forces in an unregulated market that is not backed by a government. Regulatory actions that may limit or enhance the ability to exchange or utilize cryptocurrencies for payments could impact their demand, and future regulatory changes could be detrimental to the Fund's investments. Development and acceptance of competing platforms or technologies could also affect the use of cryptocurrencies. Additionally, potential fraud, security breaches, business failures, and technical defects pose significant risks to companies engaged in cryptocurrency activities. Cryptocurrency's reliance on internet connectivity, its decentralized nature, and its usage of open-source technologies may further increase risks of fraud or cyber-attacks.

The market for cryptocurrency futures is potentially less liquid and more volatile than more established futures markets, despite substantial growth since trading commenced. The pricing of cryptocurrency futures contracts is influenced by various factors, including supply, demand, market conditions, position limits, accountability levels, collateral requirements, and the availability of counterparties. Consequently, these contracts could trade at a significant premium over the spot price of cryptocurrency. If the Fund purchases futures

contracts at a premium and this premium declines, it could negatively impact the value of an investment in the Fund. The Fund's ability to achieve its desired exposure to cryptocurrency futures contracts could be limited by these factors, potentially affecting its returns.

Currency Risk. Currency risk is the risk that changes in currency exchange rates will negatively affect securities denominated in, and/or receiving revenues in, foreign currencies. The liquidity and trading value of foreign currencies could be affected by global economic factors, such as inflation, interest rate levels, and trade balances among countries, as well as the actions of sovereign governments and central banks. Adverse changes in currency exchange rates (relative to the U.S. dollar) may erode or reverse any potential gains from the Fund's investments in securities denominated in a foreign currency or may widen existing losses.

Derivatives Risk. Derivatives are financial instruments that derive value from the underlying reference asset or assets, such as stocks, bonds, commodities, currencies, funds (including ETFs), interest rates or indexes. The Fund's investments in derivatives may pose risks in addition to, and greater than, those associated with directly investing in securities or other ordinary investments, including risk related to the market, imperfect correlation with underlying investments or the Fund's other portfolio holdings, higher price volatility, lack of availability, counterparty risk, liquidity, valuation and legal restrictions. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The use of derivatives may result in larger losses or smaller gains than directly investing in the underlying reference asset(s). Because derivatives often require only a limited initial investment, the use of derivatives may expose the Fund to losses in excess of those amounts initially invested. In addition, the Fund's investments in derivatives are subject to the following risks:

Futures Contracts. Risks of futures contracts include: (i) an imperfect correlation between the value of the futures contract and the underlying asset; (ii) possible lack of a liquid secondary market; (iii) the inability to close a futures contract when desired; (iv) losses caused by unanticipated market movements, which may be unlimited; (v) an obligation for the Fund to make daily cash payments to maintain its required margin, particularly at times when the Fund may have insufficient cash; and (vi) unfavorable execution prices from rapid selling.

Forward Currency Contracts Risk. The Fund invests in forward currency contracts. A forward currency contract is a negotiated agreement between the contracting parties to exchange a specified amount of currency at a specified future time at a specified rate. The rate can be higher or lower than the spot rate between the currencies that are the subject of the contract. Forward currency contracts may be used to protect against uncertainty in the level of future foreign currency exchange rates or to gain or modify exposure to a particular currency. Hedging the Fund's currency risks involves the risk of mismatching the Fund's objectives under a forward contract with the value of securities denominated in a particular currency. Furthermore, such transactions reduce or preclude the opportunity for gain if the value of the currency should move in the direction opposite to the position taken. There is an additional risk to the effect that currency contracts create exposure to currencies in which the Fund's securities are not denominated. Unanticipated changes in currency prices may result in poorer overall performance for the Fund than if it had not entered into such contracts.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as "Authorized Participants" or "APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occurs, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. Any such decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Fund shares trading at a premium or discount to its NAV with possible greater than normal intraday bid-ask spreads.
- *Cash Redemption Risk.* An ETF's investment strategy may require it to redeem its shares for cash or to otherwise include cash as part of its redemption proceeds. For example, an ETF may not be able to redeem in-kind certain securities held by the ETF (e.g., derivative instruments). In such a case, the ETF may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the ETF to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the ETF may pay out higher annual capital gain distributions than if the in-kind redemption process was used. By paying out higher annual capital gain distributions, investors may be subjected to increased capital gains taxes.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility and when there may be widening bid-ask spreads. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant which would result in a further widening of the bid-ask spreads.
- *Trading.* Although Shares are listed for trading on a national securities exchange, such as the NYSE Arca, Inc. (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any measurable volume on any stock exchange. That is, an active trading market for shares of the Fund may not develop or be maintained. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's portfolio holdings, which could be less liquid than Shares.

Equity Market Risk. By virtue of the Fund's investments in equity securities, the Fund is exposed to common stocks which subjects the Fund to equity market risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers. Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests.

Fixed Income Securities Risk. The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower-rated securities are more volatile than shorter-term and higher-rated securities.

Foreign Securities Risk. The Fund may invest in foreign securities. Such investments involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies. Financial markets in foreign countries often are not as developed, efficient, or liquid as financial markets in the United States, and therefore, the prices of non-U.S. securities and instruments can be more volatile. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, which may include the imposition of economic sanctions. Generally, there is less readily available and reliable information about non-U.S. issuers due to less rigorous disclosure or accounting standards and regulatory practices.

General Market Risk. Global economies and financial markets are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Futures in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes. This could be due to a number of factors, including inflation (or expectations of inflation), interest rates, global demand for particular products or resources, natural disasters or events, pandemic diseases, terrorism, regulatory events, and change in government controls.

Illiquid Investments Risk. The Fund's investments may at times become illiquid, this lack of liquidity could be caused by the absence of a readily available market or because of legal or contractual restrictions on sales. It is possible the Fund could lose money if it is unable to dispose of an investment at a time or price that is most beneficial to the Fund.

Interest Rate Risk: Interest rate risk is the risk that prices of fixed income securities generally increase when interest rates decline and decrease when interest rates increase. The Fund may lose money if short-term or long-term interest rates rise sharply or otherwise change in a manner not anticipated by the Sub-Adviser.

Over the past several years, the Federal Reserve has maintained the level of interest rates at or near historic lows. However, more recently, interest rates have begun to increase as a result of the action that has been taken by the Federal Reserve, which has raised, and may continue to raise, interest rates. If interest rates rise, the Fund's yield may not increase proportionately, and the maturities of fixed income securities that can be prepaid or called by the issuer may be extended. Changing interest rates may have unpredictable effects on the markets and the Fund's investments. A general rise in interest rates may cause investors to move out of fixed income securities on a large scale, which could adversely affect the price and liquidity of fixed income securities. The Fund may be exposed to heightened interest rate risk as interest rates rise from historically low levels. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Fund.

Leverage Risk. The derivative instruments in which the Fund may invest provide the economic effect of financial leverage by creating additional investment exposure to the underlying instrument, as well as the potential for greater loss. **If the Fund uses leverage through purchasing derivative instruments, the Fund has the risk that losses may exceed the net assets of the Fund.** The net asset value of the Fund while employing leverage will be more volatile and sensitive to market movements.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on Chesapeake’s success or failure to implement investment strategies for the Fund and the Subsidiary.

In particular, the performance of the Fund depends on the ability of Chesapeake to anticipate price movements in the relevant markets and underlying derivative instruments and futures contracts. Such price movements may be volatile and may be influenced by, among other things: (i) changes in interest rates; (ii) governmental, agricultural, trade, fiscal, monetary and exchange control programs and policies; (iii) weather and climate conditions; (iv) natural disasters, such as hurricanes; (v) changing supply and demand relationships; (vi) changes in balances of payments and trade; (vii) U.S. and international rates of inflation and deflation; (viii) currency devaluations and revaluations; (ix) U.S. and international political and economic events; and (x) changes in philosophies and emotions of various market participants.

Chesapeake’s investment process may not take all of these factors into account. The successful use of futures contracts and other derivatives draws upon Chesapeake’s skill and experience with respect to such instruments and are subject to special risk considerations.

Market Capitalization Risk.

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.
- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- *Micro-Capitalization Investing.* Micro-capitalization companies often have limited product lines, narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies, including companies which are considered small- or mid-capitalization. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

Non-Diversification Risk. Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund’s overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

Recent Market Events Risk. U.S. and international markets have experienced significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including the impact of COVID-19 as a global pandemic, which has resulted in a public health crisis, disruptions to business operations and supply chains, stress on the global healthcare system, growth concerns in the U.S. and overseas, staffing shortages and the inability to meet consumer demand, and widespread concern and uncertainty. The global recovery from COVID-19 is proceeding at slower than expected rates due to the emergence of variant strains and may last for an extended period of time. Continuing uncertainties regarding interest rates, rising inflation, political events, rising government debt in the U.S. and trade tensions also contribute to market volatility. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so.

Short Sales Risk. In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses for the Fund’s portfolio.

Sub-Adviser Strategy Risk. The performance of the Fund's Derivatives and Long-Short Strategies depends primarily on the ability of Chesapeake to react to price movements in the relevant markets and underlying derivative instruments and futures and forward contracts. Such price movements may be volatile and may be influenced by, among other things:

- changes in interest rates;
- governmental, agricultural, trade, fiscal, monetary and exchange control programs and policies;
- weather and climate conditions;
- natural disasters, such as hurricanes;
- changing supply and demand relationships;
- changes in balances of payments and trade;
- U.S. and international rates of inflation and deflation;
- currency devaluations and revaluations;
- U.S. and international political and economic events; and
- changes in the philosophies and emotions of various market participants.

Chesapeake's investment process may not take all of these factors into account. The successful use of futures contracts and other derivatives draws upon Chesapeake's skill and experience with respect to such instruments and are subject to special risk considerations.

The trading decisions of Chesapeake are based in part on mathematical models, which are implemented as automated computer algorithms that Chesapeake has developed over time. The successful operation of the automated computer algorithms on which Chesapeake's trading decisions are based is reliant upon Chesapeake's information technology systems and its ability to ensure those systems remain operational and that appropriate disaster recovery procedures are in place. Further, as market dynamics shift over time, a previously highly successful model may become outdated, perhaps without Chesapeake recognizing that fact before substantial losses are incurred. There can be no assurance that Chesapeake will be successful in maintaining effective mathematical models and automated computer algorithms.

There is no assurance that the Fund's investment in a derivative instrument with leveraged exposure to certain investments and markets will enable the Fund to achieve its investment objective.

Tax Risk. The Fund intends to treat any income it may derive from futures received by the Subsidiary as "qualifying income" under the provisions of the Code applicable to RICs. The IRS has issued numerous private letter rulings ("PLRs") to third parties not associated with the Fund or its affiliates (which would only allow those parties to rely on as a precedent) concluding that similar arrangements resulted in qualifying income, many of such PLRs have now been revoked by the IRS. In March of 2019, the IRS published Regulations that concluded that income from a corporation similar to the Subsidiary would be qualifying income, if the income is related to the Fund's business of investing in stocks or securities. Although the Regulations do not require distributions from the Subsidiary, the Fund could possibly cause the Subsidiary to make distributions to the Fund for the purposes of potentially making distributions to its shareholders. The Fund generally will be required to include in its own taxable income the income of the Subsidiary for a tax year, regardless of whether the Fund receives a distribution of the Subsidiary's income in that tax year. This income would be subject to the distribution requirement for qualification as a regulated investment company and would be taken into account for purposes of the 4% excise tax.

If the Fund did not qualify as a RIC for any taxable year and certain relief provisions were not available, the Fund's taxable income would be subject to tax at the Fund level and to a tax at the shareholder level when such income is distributed. In such event, in order to re-qualify for taxation as a RIC the Fund might be required to recognize unrealized gains, pay substantial taxes and interest penalties and make certain distributions. This would cause investors to incur higher tax liabilities than they otherwise would have incurred, which would have a negative impact on the Fund's returns. In such event, the Fund's Board of Trustees may determine to reorganize or close the Fund or materially change the Fund's investment objective and strategies. In the event that the Fund fails to qualify as a RIC, the Fund will promptly notify shareholders of the implications of that failure.

Underlying Fixed Income ETF Risks. The Fund (and the Subsidiary) may invest in fixed income ETFs indirectly via futures contracts or other derivatives transactions. The Fund will be subject to substantially the same risks as those associated with the indirect ownership of securities held by the fixed income ETFs.

U.S. Government and U.S. Agency Obligations Risk. The Fund may invest in securities issued by the U.S. government or its agencies or instrumentalities. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. Although U.S. Treasuries are backed by the U.S. government, those government policies may change both in terms of the payment of interest and in the payment of principal. Furthermore, while holding a treasury until maturity can guarantee principal, selling a treasury prior to maturity or buying a treasury subsequent to issue date may put principal at risk.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund's daily portfolio holdings will be available on the Fund's website at <https://tfpnetf.com/>. A complete description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information (the "SAI").

MANAGEMENT

Investment Adviser

Toroso Investments, LLC, located at 234 West Florida Street, Suite 203, Milwaukee, Wisconsin 53204, is an SEC-registered investment adviser and a Delaware limited liability company. Toroso was founded in and has been managing investment companies since March 2012 and Toroso is dedicated to understanding, researching and managing assets within the expanding ETF universe. As of May 31, 2023, Toroso had assets under management of approximately \$6.3 billion and served as the investment adviser or sub-adviser for 104 registered funds.

Toroso serves as investment adviser to the Fund and has overall responsibility for the general management and administration of the Fund pursuant to an investment advisory agreement with the Trust, on behalf of the Fund (the "Advisory Agreement"). The Adviser is also responsible for trading portfolio securities and financial instruments for the Fund, including selecting broker-dealers to execute purchase and sale transactions. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, and all other related services necessary for the Fund to operate. For the services it provides to the Fund, the Fund pays the Adviser a unitary management fee, which is calculated daily and paid monthly, at an annual rate of 0.99% of the Fund's average daily net assets.

Under the Advisory Agreement, in exchange for a single unitary management fee from the Fund, the Adviser has agreed to pay all expenses incurred by the Fund except for interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act (collectively, the "Excluded Expenses").

The Adviser also serves as the investment adviser to the Subsidiary, a wholly-owned and controlled subsidiary of Fund, organized under the laws of the Cayman Islands as an exempted company, pursuant to an investment advisory agreement with the Subsidiary (the "Subsidiary Advisory Agreement"). The Adviser is also responsible for trading portfolio securities and financial instruments for the Subsidiary, including selecting broker-dealers to execute purchase and sale transactions. The Adviser does not receive additional compensation for its services to the Subsidiary. The investment advisory agreement between the Adviser and the Subsidiary was approved by the Board. However, because the Subsidiary is not registered under the 1940 Act, it is not subject to the regulatory protections of the 1940 Act and the Fund, as an investor in the Subsidiary, will not have all of the protections offered to investors in registered investment companies. Because the Fund wholly owns and controls the Subsidiary, and the Adviser is subject to the oversight of the Board, it is unlikely that the Subsidiary will take action contrary to the interests of the Fund or its shareholders. Additionally, as part of the Board's consideration of the Advisory Agreement between the Trust and the Adviser, the Board will also consider the Adviser's performance with regard to the Subsidiary.

Chesapeake - Investment Sub-Adviser & Futures Trading Advisor

Chesapeake Capital Corporation ("Chesapeake"), located at 100 South Ashley Drive, Suite 1140, Tampa, Florida 33602, is an SEC-registered investment adviser and an Illinois corporation. Chesapeake became registered as an investment adviser with the SEC in 2016. Chesapeake has been registered as a commodity trading advisor and as a commodity pool operator with the CFTC 1988 and 1991, respectively, and has also been a member of the National Futures Association ("NFA") since 1988. As of May 31, 2023, Chesapeake had approximately \$183 million in assets under management.

Chesapeake is responsible for the day-to-day management of the Fund's portfolio, including determining the securities and financial instruments purchased and sold by the Fund, subject to the supervision of the Adviser and the Board. Chesapeake is also responsible for the day-to-day management of the Fund's (and the Subsidiary's) commodities portfolio, including determining the financial instruments to be purchased and sold by the Fund and the Subsidiary, subject to the supervision of the Adviser and the Board.

For its services as sub-adviser, Chesapeake is entitled to receive a fee from the Adviser, which fee is calculated daily and payable monthly, at an annual rate of 0.040% of the average daily net assets of the Fund. However, as Fund Sponsor, Chesapeake may automatically waive all or a portion of its sub-advisory fee. See "Fund Sponsors" below for more information.

Chesapeake serves as a sub-advisor to the Fund, pursuant to a sub-advisory agreement between the Adviser and Chesapeake (the "Chesapeake Sub-Advisory Agreement"). Chesapeake also serves as futures trading advisor to the Subsidiary, pursuant to a futures trading agreement among the Adviser, Chesapeake and the Subsidiary (the "Subsidiary Trading Agreement"). Chesapeake does not receive additional compensation for services to the Subsidiary. Each of the Chesapeake Sub-Advisory Agreement and the Subsidiary Trading Agreement was approved by the Board.

Blueprint - Investment Sub-Adviser

Blueprint Fund Management, LLC ("Blueprint"), located at 1250 Revolution Mill Dr., Suite 150, Greensboro, NC 27405, is an SEC-registered investment adviser and a North Carolina limited liability company. Blueprint became registered as an investment adviser with the SEC in 2019. As of May 31, 2023, Blueprint had approximately \$97 million in assets under management.

Blueprint is responsible for the day-to-day management of the Fund's cash portfolio, subject to the supervision of the Adviser and the Board.

For its services as sub-adviser, Blueprint is entitled to receive a fee from the Adviser, which fee is calculated daily and payable monthly, at an annual rate of 0.040% of the average daily net assets of the Fund. However, as Fund Sponsor, Blueprint may automatically waive all or a portion of its sub-advisory fee. See "Fund Sponsors" below for more information.

Blueprint serves as a sub-advisor to the Fund, pursuant to a sub-advisory agreement between the Adviser and Blueprint (the "Blueprint Sub-Advisory Agreement"). The Blueprint Sub-Advisory Agreement was approved by the Board.

Advisory, Futures Trading Advisory, and Sub-Advisory Agreements

A discussion regarding the basis for the Board's approval of each of the Fund's Advisory Agreement, Subsidiary Trading Agreement, Chesapeake Sub-Advisory Agreement, and Blueprint Sub-Advisory Agreement will be available in the Fund's semi-annual report to shareholders for the period ending December 2023.

CFTC Regulation

Because of the nature of its investments, the Fund is subject to regulation under the Commodities Exchange Act of 1936, as amended (the "CEA"), as a commodity pool and the Adviser is subject to regulation under the CEA as a commodity pool operator ("CPO") with respect to the Fund, as those terms are defined under the CEA. Chesapeake is a registered commodity pool operator and commodity trading advisor ("CTA"). The Adviser and Chesapeake are regulated by the CFTC and the National Futures Association and are subject to those regulator's disclosure requirements. Further, the Adviser is regulated by the SEC and is subject to its disclosure requirements. The CFTC has adopted rules that are intended to harmonize certain CEA disclosure requirements with SEC disclosure requirements, including Rule 4.12(c)(3)(i) under the CEA, which requires the CPO of a registered investment company with less than three years of operating history to disclose the performance of all accounts and pools that are managed by the CPO and that have investment objectives, policies and strategies substantially similar to those of the newly-formed registered investment company. The CPO has not managed accounts and/or pools that have investment objectives, policies, and strategies substantially similar to those of the Fund.

Portfolio Managers

The following individuals (each, a "Portfolio Manager") have served as portfolio managers of the Fund and, if indicated, the Subsidiary since their inception in 2023.

Jerry Parker, Portfolio Manager for Chesapeake – Fund & Subsidiary

Mr. Parker is the Chairman of the Board of Directors and the Chief Executive Officer of Chesapeake and Chesapeake Holding Company. Mr. Parker has overseen Chesapeake's operations and its trading since its inception in 1988. Mr. Parker received a Bachelor of Science degree in Commerce with an emphasis in Accounting from the University of Virginia in January 1980.

Jon Robinson, Portfolio Manager for Blueprint – Fund

Jon Robinson is a co-founder and CEO of Blueprint Fund Management and Blueprint Investment Partners. Jon began his career as a trader and market maker at Bear Stearns before serving as an Equity Research Analyst with Prudential Equity Group. Prior to founding

Blueprint, he co-founded a quantitative alternative investment firm, Robinson-Langley Capital Management. Mr. Robinson serves on the Department of Economics Board of Advisors for The Bryan School of Business and Economics at the University of North Carolina at Greensboro, and is a board member at Priority One Greensboro and the Spartan Leadership Foundation. Mr. Robinson earned bachelor's degrees in finance and economics from the University of North Carolina at Greensboro.

Qiao Duan, CFA, Portfolio Manager for the Adviser – Fund & Subsidiary

Qiao Duan serves as Portfolio Manager at the Adviser, having joined the firm in October 2020. From February 2017 to October 2020, she was an execution Portfolio Manager at Exponential ETFs, where she managed research and analysis relating to all Exponential ETF strategies. Ms. Duan previously served as a portfolio manager for the Exponential ETFs from their inception in May 2019 until October 2020. Ms. Duan received a Master of Science in Quantitative Finance and Risk Management from the University of Michigan in 2016 and a Bachelor of Science in Mathematics and Applied Mathematics from Xiamen University in 2014. She holds the CFA designation.

Charles A. Ragauss, CFA, Portfolio Manager for the Adviser – Fund & Subsidiary

Mr. Ragauss serves as Portfolio Manager of the Adviser, having joined the Adviser in September 2020. Mr. Ragauss previously served as Chief Operating Officer and in other roles at CSat Investment Advisory, L.P. from April 2016 to September 2020. Previously, Mr. Ragauss was Assistant Vice President at Huntington National Bank (“Huntington”), where he was Product Manager for the Huntington Funds and Huntington Strategy Shares ETFs, a combined fund complex of almost \$4 billion in assets under management. At Huntington, he led ETF development bringing to market some of the first actively managed ETFs. Mr. Ragauss joined Huntington in 2010. Mr. Ragauss attended Grand Valley State University where he received his Bachelor of Business Administration in Finance and International Business, as well as a minor in French. He is a member of both the National and West Michigan CFA societies and holds the CFA designation.

CFA® is a registered trademark owned by the CFA Institute.

The Fund's SAI provides additional information about each Portfolio Manager's compensation structure, other accounts that each Portfolio Manager manages, and each Portfolio Manager's ownership of Shares.

Fund Sponsors

The Adviser has entered into a fund sponsorship agreement with each of Chesapeake and Blueprint (together, the “Sponsors”) pursuant to which each is a sponsor to the Fund. Under this arrangement, each Sponsor has agreed to provide financial support (as described below) to the Fund. Every month, the unitary management fees for the Fund are calculated and paid to the Adviser, and the Adviser retains a portion of the unitary management fees from the Fund. In return for its financial support for the Fund, the Adviser has agreed to pay the Sponsors any remaining profits generated by unitary management fee for the Fund. Depending on the Fund's asset level, Chesapeake will receive between 50% and 60% of such profits, and Blueprint will receive between 40% and 50% of such profits. If the amount of the unitary management fees for the Fund exceeds the Fund's operating expenses and the Adviser-retained amount, that excess amount is considered “remaining profit.” In that case, the Adviser will pay the remaining profits to the Sponsors. Further, if the amount of the unitary management fee for the Fund is less than the Fund's operating expenses and the Adviser-retained amount, each Sponsor is obligated to reimburse the Adviser for the shortfall.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book-entry or "street name" through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with the NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for the Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security or other asset held by the Fund or is determined to be unreliable, the security or other asset will be valued at fair value estimates under guidelines established by the Adviser (as described below).

Fair Value Pricing

The Board has designated the Adviser as the "valuation designee" for the Fund under Rule 2a-5 of the 1940 Act, subject to its oversight. The Adviser has adopted procedures and methodologies, which have been approved by the Board, which have been approved by the Board, to fair value Fund investments whose market prices are not "readily available" or are deemed to be unreliable. For example, such circumstances may arise when: (i) an investment has been delisted or has had its trading halted or suspended; (ii) an investment's primary pricing source is unable or unwilling to provide a price; (iii) an investment's primary trading market is closed during regular market hours; or (iv) an investment's value is materially affected by events occurring after the close of the investment's primary trading market. Generally, when fair valuing an investment, the Adviser will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the investment, general and/or specific market conditions, and the specific facts giving rise to the need to fair value the investment. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Adviser-adopted valuation procedures. The Board has approved the procedures adopted by the Adviser to fair value Fund investments whose market prices are not "readily available" or are deemed to be unreliable. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser will be able to obtain the fair value assigned to the investment upon the sale of such investment.

Investments by Other Registered Investment Companies in the Fund

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions of rules under the 1940 Act, including that such investment companies enter into an agreement with the Fund.

Delivery of Shareholder Documents – Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund is not managed to earn dividends and interest income, but if it does earn any dividends or interest income, it will distribute them to shareholders at least annually. If the Fund declares and pays income and capital gains distributions it would be done in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a regulated investment company (a “RIC”) under the Internal Revenue Code of 1986, as amended (the “Code”). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund-level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this Prospectus. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Taxes on Distributions

For federal income tax purposes, distributions of net investment income are generally taxable to shareholders as ordinary income or qualified dividend income. Taxes on distributions of net capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund’s net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends (“Capital Gain Dividends”) will be taxable as long-term capital gains to shareholders. Distributions of short-term capital gain will generally be taxable to shareholders as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as “qualified dividend income” are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. “Qualified dividend income” generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

In addition to the federal income tax, certain individuals, trusts, and estates may be subject to a Net Investment Income (“NII”) tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer’s investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer’s modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund’s distributions are includable in a shareholder’s investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder’s investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable to you even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares’ NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable to you even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act (“FATCA”), the Fund may be required to withhold a generally nonrefundable 30% tax on distributions of net investment income paid to (A) certain “foreign financial institutions” unless such foreign financial institution agrees to verify, monitor, and report to the Internal Revenue Service (“IRS”) the identity of certain of its account-holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution’s country of residence), and (B) certain “non-financial foreign entities” unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. This FATCA withholding tax could also affect the Fund’s return on its investments in foreign securities or affect a shareholder’s return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that they are not subject to such withholding.

Taxes When Shares are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of substantially identical Shares.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP’s aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP’s basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year and as a short-term capital gain or loss if such Shares have been held for one year or less.

The Fund will pay cash upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Taxation of the Subsidiary

There is, at present, no direct taxation in the Cayman Islands and interest, dividends and gains payable to the Subsidiary will be received free of all Cayman Islands taxes. The Subsidiary is registered as an “exempted company” pursuant to the Companies Law (as amended). The Subsidiary has received an undertaking from the Governor in Cabinet of the Cayman Islands to the effect that, for a period of twenty years from the date of the undertaking, no law that thereafter is enacted in the Cayman Islands imposing any tax or duty to be levied on profits, income or on gains or appreciation, or any tax in the nature of estate duty or inheritance tax, will apply to any property comprised in or any income arising under the Subsidiary, or to the shareholders thereof, in respect of any such property or income.

A foreign corporation, such as the Subsidiary, generally is not subject to federal income tax unless it is engaged in the conduct of a trade or business in the United States. With respect to its investments in the United States, the Subsidiary intends to operate in a manner that is expected to meet the requirements of a safe harbor under section 864(b)(2) of the Code, under which it may trade in stocks or securities or certain commodities for its own account without being deemed to be engaged in a U.S. trade or business. If, however, certain of the Subsidiary's activities did not meet those safe harbor requirements, it might be considered as engaging in such a trade or business. There can be no assurance that the Subsidiary will not recognize any taxable effectively connected income. The imposition of U.S. federal tax on the Subsidiary's effectively connected income could significantly reduce the Fund's returns. The federal income tax treatment of the Fund's income from the Subsidiary also may be adversely affected by future legislation, regulations, and/or other guidance issued by the Internal Revenue Service that could affect the character, timing of recognition, and/or amount of the Fund's taxable income and/or net capital gains and, therefore, the distributions it makes.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to foreign, state, and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

DISTRIBUTION

Foreside Fund Services, LLC (the "Distributor"), the Fund's distributor, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101.

The Board has adopted a Distribution (Rule 12b-1) Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to pay distribution fees for the sale and distribution of its Shares.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

When available, information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found on the Fund's website at <https://tfpnetf.com/>.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to the owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Advisers, the Fund, and the Subsidiary make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

The Second Amended and Restated Declaration of Trust ("Declaration of Trust") provides a detailed process for the bringing of derivative or direct actions by shareholders in order to permit legitimate inquiries and claims while avoiding the time, expense, distraction, and other harm that can be caused to a Fund or its shareholders as a result of spurious shareholder demands and derivative actions. Prior to bringing a derivative action, a demand by three unrelated shareholders must first be made on a Fund's Trustees. The Declaration of Trust details various information, certifications, undertakings and acknowledgments that must be included in the demand. Following receipt of the demand, the trustees have a period of 90 days, which may be extended by an additional 60 days, to consider the demand. If a majority of the Trustees who are considered independent for the purposes of considering the demand determine that maintaining the suit would not be in the best interests of the Fund, the Trustees are required to reject the demand and the complaining shareholders may not proceed with the derivative action unless the shareholders are able to sustain the burden of proof to a court that the decision of the Trustees not to pursue the requested action was not a good faith exercise of their business judgment on behalf of the Fund. The Declaration of Trust further provides that shareholders owning Shares representing no less than a majority of a Fund's outstanding shares must join in bringing the derivative action. If a demand is rejected, the complaining shareholders will be responsible for the costs and expenses (including attorneys' fees) incurred by the Fund in connection with the consideration of the demand, if a court determines that the demand was made without reasonable cause or for an improper purpose. If a derivative action is brought in violation of the Declaration of Trust, the shareholders bringing the action may be responsible for the Fund's costs, including attorneys' fees, if a

court determines that the action was brought without reasonable cause or for an improper purpose. The Declaration of Trust provides that no shareholder may bring a direct action claiming injury as a shareholder of the Trust, or any Fund, where the matters alleged (if true) would give rise to a claim by the Trust or by the Trust on behalf of a Fund, unless the shareholder has suffered an injury distinct from that suffered by the shareholders of the Trust, or the Fund, generally. Under the Declaration of Trust, a shareholder bringing a direct claim must be a shareholder of the Fund with respect to which the direct action is brought at the time of the injury complained of or have acquired the shares afterwards by operation of law from a person who was a shareholder at that time. The Declaration of Trust further provides that a Fund shall be responsible for payment of attorneys' fees and legal expenses incurred by a complaining shareholder only if required by law, and any attorneys' fees that the Fund is obligated to pay shall be calculated using reasonable hourly rates. These provisions do not apply to claims brought under federal securities laws.

The Declaration of Trust also requires that actions by shareholders against a Fund be brought exclusively in a federal or state court located within the State of Delaware. This provision will not apply to claims brought under federal securities laws. Limiting shareholders' ability to bring actions only in courts located in Delaware may cause shareholders economic hardship to litigate the action in those courts, including paying for travel expenses of witnesses and counsel, requiring retaining local counsel, and may limit shareholders' ability to bring a claim in a judicial forum that shareholders find favorable for disputes, which may discourage such actions.

FINANCIAL HIGHLIGHTS

This section would ordinarily include Financial Highlights. The Financial Highlights table is intended to help you understand the Fund's performance for the Fund's periods of operations. Because the Fund has not yet commenced operations as of the date of this Prospectus, no Financial Highlights are shown.
